

Marine Pumps

Marine Pumps
Pumps

Mermaid's marine pumps are designed to operate in either salt water or fresh water applications.

Pumps will range from a single unit application pump to multiple unit applications. Ranges are from 250 Gallons per Hour to over 1200 Gallons per Hour.

Each Mermaid unit ranges from a **MINIMUM** of 250 GPH to a **MAXIMUM** of 550 GPH.

Mermaids base unit priced pump is the TEEL pump, however, March pumps are

HIGHLY recommended.

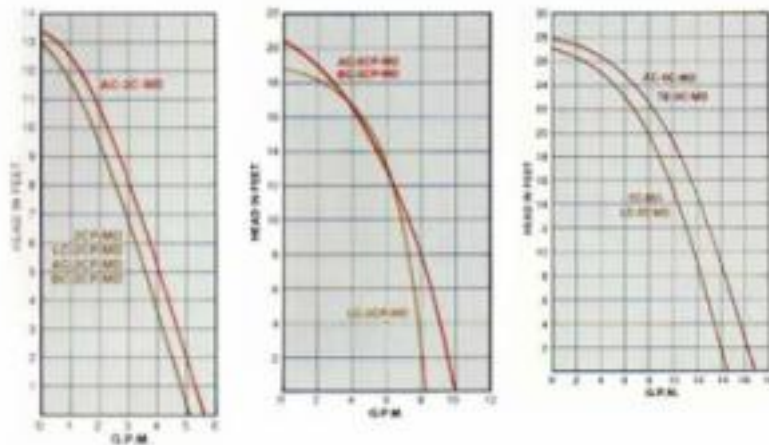

Mermaid's smallest pump, the March LC-2CP-MD pump is designed for single unit applications @ 285 Gallon per Hour to be used with no more than a one foot vertical lift and no more than 10 feet of overall hose. This pump can be used for units ranging in size from the 5200BTU - 9000BTU system.

Mermaid's second pump, the Teel 1P808 pump is designed for single unit applications @ 400 Gallons per Hour to be used with no more than a five foot vertical lift and no more than 15 feet of overall hose. This pump can be used for all Mermaid units.

Mermaid's third pump, the March LC-3CP-MD pump is the most universal pump offered by Mermaid. This pump is a single unit application pump @ 500 Gallons per Hour to be used with no more than 8 foot vertical lift and 20 feet of overall hose. This pump can be used on all Mermaid units.

Mermaid's fourth pump, the March LC-5CP-MD pump operates at just under 1000 Gallons per Hour and can be used on single unit applications where a very high "lift" is present or a great deal of hose is needed. This pump is also ideal for multiple unit applications.

Keep in mind, each unit needs a **MINIMUM** of 250 GPH and a **MAXIMUM** of 550 GPH. Vertical lift and overall hose do play a factor in the GPH at the unit. Every 10ft of hose is equivalent to a one foot vertical lift. Refer to the Pump Lift Charts to aid you in your selection..

Larger, multiple unit pumps are also available upon request. Please contact the Mermaid factory for information.

NOTE: BASE PRICE OF \$89.00 IS FOR THE TEEL PUMP ONLY. EACH PRICE AFTER THE OTHER MODEL PUMPS ON THE PULL DOWN MENU BELOW NEEDS TO BE ADDED TO THE \$89.00.

Price \$89.00

Marine Application Sea Water Pumps

MARCH LC-2CP-MD:

- Liquid cooled, Maroon color epoxy body
- 3/4" Inlet, 1/2" outlet (5/8" hose)
- 1/35 HP motor - 1.1 amps @ 110v
- 220v 50/60hz available

TEEL PUMP:

- Liquid cooled, Red body
- 3/4" Inlet, 1/2" outlet (5/8" hose)
- 1/50 HP motor - 1.5 amps @ 110v
- 220v not available

MARCH LC-3CP-MD:

- Liquid cooled, Maroon epoxy encapsulated (open air or submerge)
- 3/4" Inlet, 1/2" outlet (5/8" hose)
- 1/20 HP motor - 2.2 amps @ 110v
- 220v available - 50hz OR 60hz needs to be determined

MARCH LC-5CP-MD

- Liquid cooled, Maroon encapsulated (open air or submerge)
- 1" FPT inlet x 1/2" MPT outlet (5/8" hose)
- 1/8 HP motor - 2.2 amps @ 110v
- 220v 50/60hz available
