

NEW!! Digital Programmable Thermostat

NEW!! Digital Programmable Thermostat
Digi-Panel

As per your request, Mermaid has a new Digital Programmable Thermostat to introduce to you! New for the 2007 season will be the panel folks like you have been looking for! It has been a long time coming....now it's here!

We have re-designed our control box to include a protected circuit board to ensure it is moisture and vibration protected. It is smaller in size than the standard control box previously provided and will have four mounting locations with rubber feet to prevent any disturbance while underway. The display panel will work on a "phone cord" concept. The Mermaid unit

will still have the 4 foot "pig-tail" harness for ease of installation and remote mounting the electrical control box.

Older Mermaid units **CAN** upgrade to this new model thermostat within minutes. Removal of the prior electrical box and thermostat will be the only required modifications! Call for details at anytime. Or email info@mmain.com for additional info.

The price below is for the new digital control panel to provided upon a newly purchased air conditioning unit. For your convenience, all electrical connections inside the elecctrical contol box have been completed. Simply connect 110v or 220v power and the pump to the control box and you are all set!

Price \$289.00

New Digital Control Panel
